

Mustafa & his friends are challenging themselves to climb Mission Peak today!

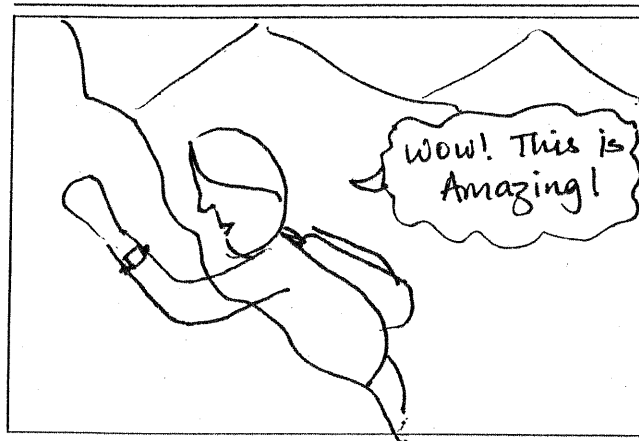

They are going to use Expetrac to capture their experiences & track each other

They select the timeline option to set up his new trip

They click on 'start new trip' & name the trip - 'Mission Peak'

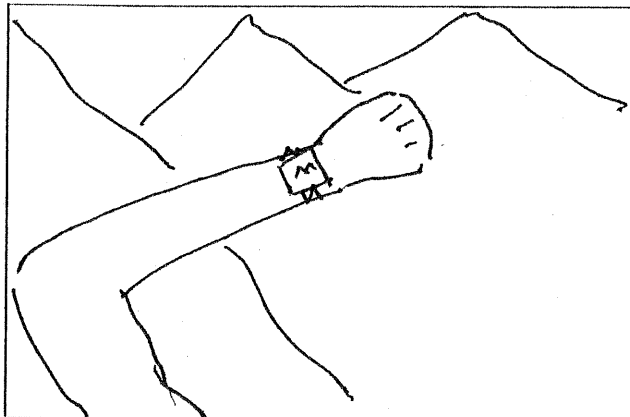

Just 200 ft away from the summit, the climb is getting difficult but the views are amazing!

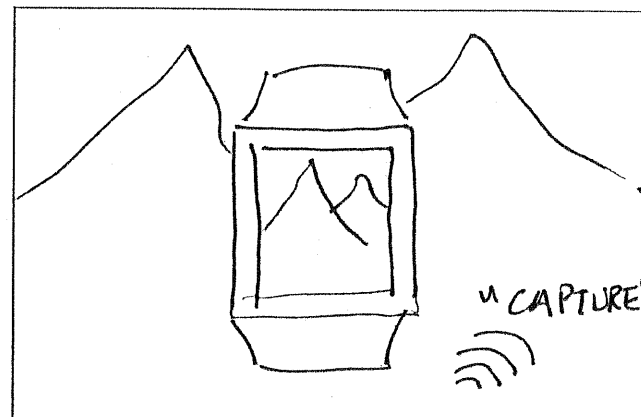

To capture these beautiful views, he issues a voice command to initiate expetrac on his smart watch

He issues the 'record photo' voice command to initiate the camera.

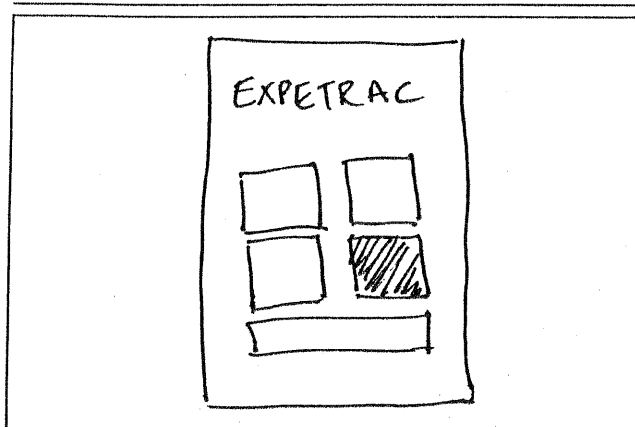

He points his smart watch camera at the beautiful view!

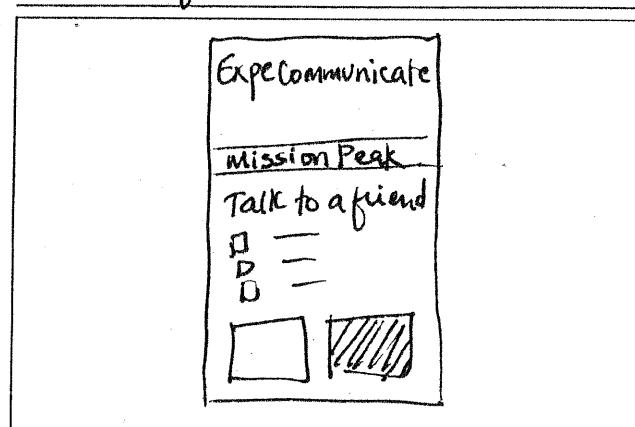

By issuing the 'capture' voice command, Expetrac captures this beautiful view for Mustafa.

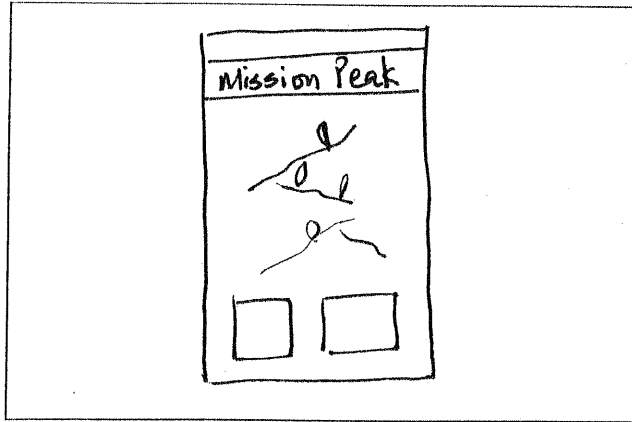

Finally he is on top of the summit! His friends are still making their way up and Mustafa wants to see where they are.

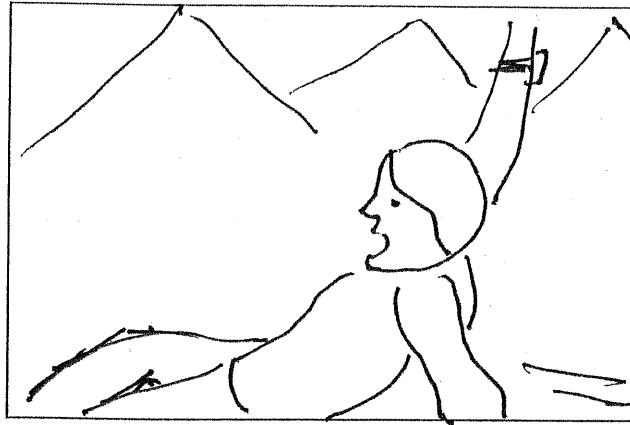

He goes to the 'communicate' option in Expetrac on his smart phone

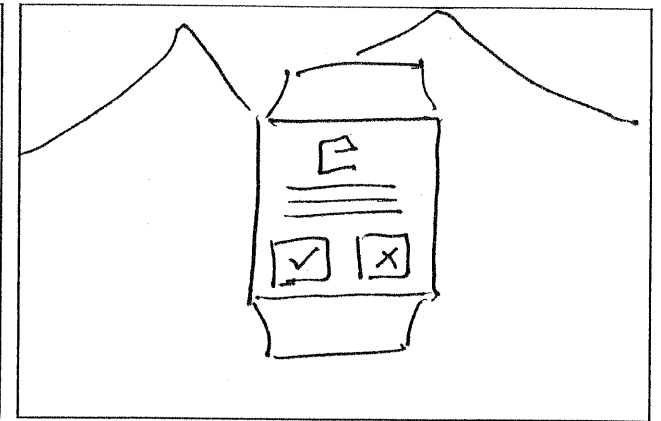

He clicks on 'see your friends'

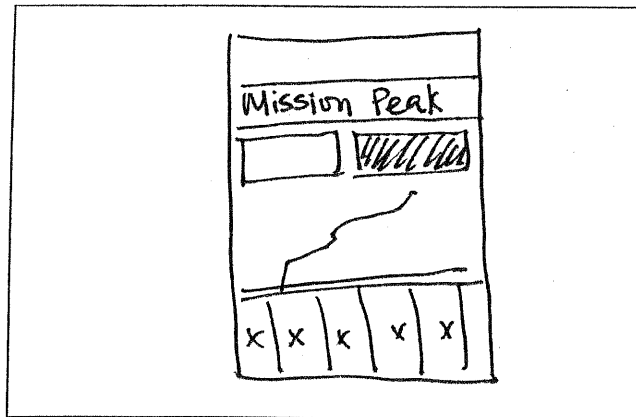

He can now see a map with his friends and their respective waypoints

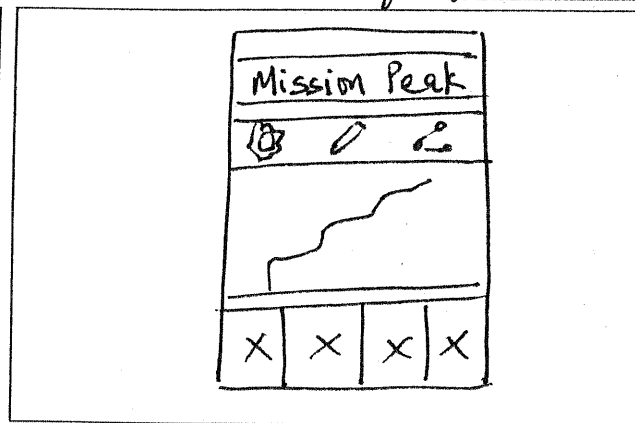

On his way down, Mustafa slips & falls. Expetrac detects rapid increase in heart rate & checks with Mustafa if he is OK

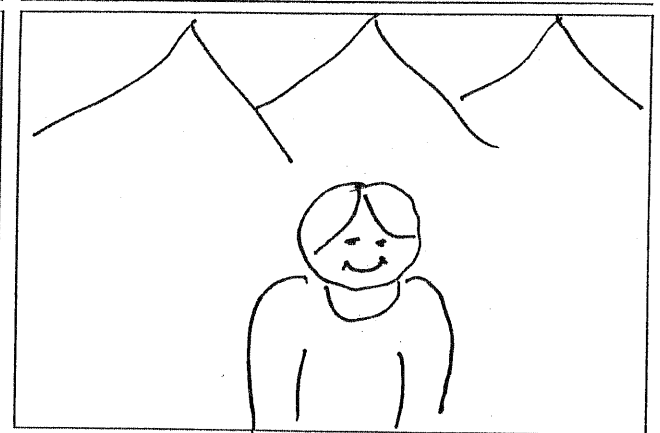

Mustafa presses the 'Ok' button as he is fine!

Once Mustafa reaches the base, he concludes his trip by clicking the 'stop' button on Expetrac.

Mustafa is excited to see the automatically generated timeline for his trip that he can now edit or share

Mustafa is happy to have captured this exciting experience which he can cherish forever!
